

# MASTER INSTALLER PHOTO GUIDELINES & REQUIREMENTS

Submit photo-documentation for **two utility-incented** installations illustrating technical compliance with Master Installer Program Best Practices - [Download Best Practices Guide here](#)

- Do not fax in photos
- Send an email with each customer name in the file name or on the scanned photos
- Each example must be a **utility-incented** installation (indicate which utility)
- Each set of photos must:
  - Show each outdoor and indoor unit installed
  - Show the line set (showing UV protection and rigid line cover)
  - Show the condensate drain termination
  - Be accompanied by the dealer company name and the customer name

Please submit photos and other enrollment materials through the on-line learning platform at <https://training.goingductless.com/learn>

or to:
